Adult Take & Make MINI MACRAME PLANT HOLDER

1. Fold 4 strands of equal length in half and tie a knot towards the top.
2. Separate your strands into pairs.
3. Decide where you want your planter to “sit”—and at that point, tie a simple overhand knot in each pair of strands. (Make sure your knots are all the same distance from the top.)
4. Separate your strands and match one strand from each pair with a strand from an adjacent pair and tie another overhand knot in each new pair 1” inch down from the first knot.
5. Then gather all the strands together 1” below the last knots and gather them all in a single overhand knot. Trim the ends as long or short as you’d like.
6. If you would like, take the single string and tie box knots throughout the length of the strings for some fancy-ness. (Video helps with this one!)

Add your planter, hang, and admire!
