Adult Take & Make PAPERBACK BOOK PUMPKIN

- 1- Fold the cardstock on the dotted line and cut out the pumpkin shape, or make your own stencil!
- 2- Take the cover off of your book and place the pumpkin pattern with the fold on the edge of your spine, and the bottom flush with the bottom edge of the book.
- 3- Trace around the pattern with a pencil, then cut into the book pages slightly inside the tracing of your pattern. Cut through 5-6 pages at a time for best results.
- 4- Repeat step 3 until you get through the whole book.
- 5- If you want to color your pumpkin, now's the time! Hold the pages together and color the edges with marker, or wait to fan it out and spray paint.
- 6- Put a thin strip of glue around the very edge of the top page and bring that back page around and attach it. Then add a strip of glue to that page, and glue the next page to it, just on the inside edges. You can use the rubber bands to hold the book together while the glue dries.
- 7- Go around pulling the pages apart and arranging them how you want them. Add a thin strip of glue at the inside by the seam if they're stubborn.
- 8- Tie the ribbon around the stem and add your book pumpkin to your fall decor!
